

Assignment Day 9 - Vectors

Store and Print Elements

```
#include <iostream>
#include <vector>
using namespace std;
int main(){ vector<int> v={10,20,30,40,50}; for(int x:v) cout<<x<<" "; return 0; }
```

Input: No Input

Output: 10 20 30 40 50

Maximum Element

```
#include <iostream>
#include <vector>
using namespace std;
int main(){ vector<int> v={10,40,5,25}; int mx=v[0]; for(int x:v) if(x>mx) mx=x; cout<<"Maximum = "<
```

Input: No Input

Output: Maximum = 40

Minimum Element

```
#include <iostream>
#include <vector>
using namespace std;
int main(){ vector<int> v={10,40,5,25}; int mn=v[0]; for(int x:v) if(x<mn) mn=x; cout<<"Minimum = "<
```

Input: No Input

Output: Minimum = 5

Reverse Vector

```
#include <iostream>
#include <vector>
using namespace std;
int main(){ vector<int> v={1,2,3,4,5}; for(int i=v.size()-1;i>=0;i--) cout<<v[i]<<" "; }
```

Input: No Input

Output: 5 4 3 2 1

Remove Duplicates

```
#include <iostream>
#include <vector>
#include <algorithm>
using namespace std;
int main(){ vector<int> v={1,2,2,3,4,4,5}; sort(v.begin(),v.end()); v.erase(unique(v.begin(),v.end()
```

Input: No Input

Output: 1 2 3 4 5

Rotate Vector

```
#include <iostream>
```

```
#include <vector>
#include <algorithm>
using namespace std;
int main(){ vector<int> v={1,2,3,4,5}; rotate(v.begin(),v.begin()+2,v.end()); for(int x:v) cout<<x<<" "; }
```

Input: No Input

Output: 3 4 5 1 2
